

Serum Skin Installation Guide

Windows & Mac Installation

1. Open Serum, hit the "MENU" button within Serum, and press on the "Show Serum Presets folder" option.
2. Once the Serum folder opens, open the "Skins" folder.
3. Now copy our skin folder "Jay Eskar's Cosmos Serum Skin" and paste that folder into the Serum "Skins" folder.
4. Reload Serum. Hit the Serum logo in the top left corner. Hover over "Skin" and select our skin "Jay Eskar's Cosmos Serum Skin. Enjoy!

Compatibility

To avoid any compatibility issues, we recommend using the latest version of xfer Serum.

If you need to update your Serum instance or need help updating, reach out to the developer at <https://xferrecords.com/>
